

Star Instruments Ltd.

Integrated Quality and Environmental Policy Statement

Star Instruments Ltd., offers a wide range of services :-

Manufacturer & Distributor: We are one of the UK and Ireland's longest established Manufacturers and Suppliers of Pressure Gauge, Temperature Gauge, Thermometer, Flow Switches and associated instruments.

Supplier & Agent: Star Instruments Ltd. is proud to be the sole UK and Ireland agent for its European Partners which include: SIKA, Schneider and PAJ. The selection of instruments available from our partners includes pressure gauges, temperature gauges, thermometers and Flow Switches, which complement our own product range.

Calibration & Repair We offer a wide-ranging calibration and repair service for all types and brands of Pressure Gauge, Temperature Gauge, and Flow Instrumentation.

Star Instruments Limited will strive to conduct its business with respect; and to protect and care for ourthe environment. We believe that employing sound environmental strategies contributes to our competitive strength and benefits our shareholders, customers, employees, and society and our environment.

We are committed to:

EMS

Comply with all compliance obligations relevant to our operations.

Set annual environmental objectives and actions to continuously improve our Environmental Management System and enhance our environmental performance.

Strive to reduce energy consumption, prevent pollution, minimise waste and use resources efficiently where we can exercise control upstream, internally and downstream of our activities.

Progressively increase our re-use and recycling of materials throughout our operations.

Review changes to our business and products considering how we can positively contribute to environmental aspects through design and purchasing decisions.

Provide education and training to our employees and interested parties to raise awareness and understanding of their responsibilities for environmental stewardship.

Conduct our business with respect for; and to protect and care for, our environment. We believe that employing sound environmental strategies contributes to our competitive strength and benefits our shareholders, customers, employees, society and our environment.

To comply with ISO 14001:2015.

QMS

To develop products that satisfy changing customer demands and are fully competitive in terms of price and delivery.

Set annual quality objectives and actions to continuously improve our Quality Management System and enhance our products and customer satisfaction.

To comply with ISO 9001:2015.

These commitments are achieved through measurable Quality and Environmental Objectives.

We will ensure that the policy is documented, implemented, maintained and communicated throughout the company, to the public through our website and to approved suppliers and contractors.

The policy and objectives will be monitored, reviewed and amended if necessary, by top management during management review meetings and communicated to all staff by posting on the factory notice boards.

Signed:

Stephen Donnelly, Managing Director
